RE: Data Analyst Internship

My name is Kobe Sarausad and I am writing to express my interest in your posted opening for a new Data Analytics Intern. I have an extreme passion for collecting, analyzing, and presenting data, specifically through R. In the new digital world, there is a new need for digital assets that promote new innovative technological services.

Through projects in school and in my own time, I have developed my skills in R:

- Built web dashboards with Shiny to present data
- Created countless data visualizations (NFL, MLB, stock prices, etc...)
- Utilized statistical analysis tools to investigate patterns in data (linear regression, SVD, PCA, etc...)
- Learned the process of building an R package by building an R package

Further, my focus, as an emerging professional, is to utilize my skills in R, specifically to discover useful insight. I enjoy collecting, organizing, and analyzing data, working in groups, and brainstorming project strategies. I am also always willing to take on new skills, on top of R, to optimize analysis, and to be the best at my task.

Sincerely,

Kobe Sarausad
